CATAMARANS

# Aventura 45

Aventura Catamarans has again trusted Cabinet Lasta Design to design a unique vessel: the Aventura 45, our new flagship. The result aligns with the desired ambitions; purity of lines, treatment of spaces, interiors and exteriors without equality in the market.

The Aventura 45 stands out for its elegant and dynamic silhouette. It is unique in the market for catamarans under 14 meters: the roof incorporates a double helmsman seat next to the roof salon for excellent user-friendliness, and the manoeuvring station is close to the pit allowing perfect control of the sails during sailing.

The outdoor lounge area is fantastic, with comfortable seating perfectly arranged around a table that can accommodate up to 12 guests, the staircase allows direct access to the roof, a sunbathing/relaxation area, ample storage space and an integrated plancha, becoming the benchmark in the sub-50 foot segment.

The architect Samer LASTA has carefully studied the furnishings and ergonomics, creating a comfortable lounge/lounge for 8 to 10 guests, a fully equipped kitchen with a 585L fridge/freezer, oven, microwave, dishwasher and finally, a navigation area that includes the EmpirBus Electricity Management Unit.

The Aventura 45 is standard in a 3-cabin version with the owner's apartment with an office area, an actual dressing room and a bathroom with a separate shower and plenty of storage space.

But charming versions are also available with 4 double cabins in Master+ and Master. Also available in charter versions with 5 or 6 double cabins with 4 bathrooms plus a skipper cabin. Aventura 45 meets all requirements.

For Aventura, a sailing catamaran needs to "line up the miles". With

a very favourable weight-to-sail ratio, the hull lines worked carefully, and the Aventura 45 remains fast at any speed. The absolute pleasure of the sea..."
